subject and title index 1979

Plastics Engineering, Volume 35

A

1. ABS

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

Taiwan gets serious about plastics, R.B. Seymour, November, p. 26

How to shorten stress test time for vacuum-formed ABS, G.W. Brewer, November, p. 28

2. Acetal

Get the most for your money from your resin supplier, P.E. Sample, December, p. 26

3. Acrylonitrile

Natec '78—a dual conference on packaging and acrylonitrile, January, p. 20, (Program of conference only)

4. Additives

Additives, fillers, and reinforcements for 1979, P.E. Staff, January, p. 25

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

Additives roundup, May, p. 80

Optimizing pigment blending, C. P. Muller, June, p. 21

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

Heat stabilizers for PVC: something old, something new, W. J. Casey, August, p. 27

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

Additives sales in Europe climb—domestic markets also strong, P. E. Staff, October, p. 62

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

Current happenings along Additives Way, P. E. Staff, December, p. 39

5. Alumina Trihydrate

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

6. Analysis

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

7. Annual Technical Conference

ANTEC '79—SPE's 37th annual technical conference, March, p. 20, (Program of conference only)

ANTEC 79—the energy picture, July, p. 38, (Conference summaries only)

The Energy Picture—Boon or Bust? J. J. McKetta, July, p. 44, (Synopsis)

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

8. Antioxidants

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

Current happenings along Additives Way, P. E. Staff, December, p. 39

9. Applications

Polyolefins, recent improvements—applications and comparisons, First Euretec, April, p. 56, (Program of conference only)

Calculating heat-exchanger capacity for a heat-recovery system, R. F. Merrill, August, p. 30

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

10. Automation

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Computer color matching makes sense even for small processors, D. M. Tompkins, June, p. 29

Part design by the numbers, B. Buszkiewicz, June, p. 37

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

11. Automobiles

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

National Technical Conference on Automotive Plastics, October, p. 30, (Program of conference only)

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

B

12. Blending

Optimizing pigment blending, C. P. Muller, June, p. 21

13. Blow Molding

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

Report from Dusseldorf, December, p. 40

C

14. Catalysts

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

15. Colorants

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Color it azo, J. Richter, April, p. 37

Optimizing pigment blending, C. P. Muller, June, p. 21

Color and appearance control, Philadelphia Section, September, p. 77, (Program of conference only)

Additives sales in Europe climb—domestic markets also strong, P. E. Staff, October, p. 62

16. Color Matching

Computer color matching makes sense even for small processors, D. M. Tompkins, June, p. 29

17. Composites

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Rotational molding: a process whose time has come, D. J. Ramazzotti, October, p. 47

18. Consumer Products

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

Predicting surface distortion in vinyl siding—and avoiding it, J. W. Summers and R. J. Brown, April, p. 34

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

19. Consumption

Plastics in the '80s will face new challenges, J. A. Rauch, May, p. 78

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

Additives sales in Europe climb—domestic markets also strong, P. E. Staff, October, p. 62

20. Containers

Tailoring molds to the high-speed production of thin-walled PP containers, S. D. J. Dagniaux, April, p. 25

21. Control

Cut injection molding costs through controlled starve feeding, D. B. Hunkar, November, p. 35

22. Coupling Agents

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

D

23. Deformation

Part design by the numbers, B. Buszkiewicz, June, p. 37

24. Design

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

Guidelines for the effective design of RIM molds, G. Misitano, February, p. 27

Pultrusion: the other process, J. D. Martin, March, p. 53

Tailoring molds to the high-speed production of thin-walled PP containers, S. D. J. Dagniaux, April, p. 25

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Part design by the numbers, B. Buszkiewicz, June, p. 37

Vary the volume, control the shrinkage, W. G. Halstead, J. R. Rinderle, and N. P. Suh, June, p. 41

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p. 18

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. G. Johnson, August, p. 23

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

Rotational molding: a process whose time has come, D. J. Ramazzotti, October, p. 47

Designing for thin-section nylon, R. Sekhar, October, p. 53

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

New strong silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

25. Divtec

Obtaining the maximum from equipment, materials and tooling, Injection Molding Division and Chicago Section, August, p. 64 (Program of conferences only)

E

26. Economics

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Reduce plant heating costs by recovering otherwise wasted energy, D. C. Williams, February, p. 35

Pultrusion: the other process, J. D. Martin, March, p. 53

Are plasticizer markets softening?, N. W. Touchette and J. W. Hirzy, April, p. 20

Computer color matching makes sense even for small processors, D. M. Tompkins, June, p. 29

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p. 18

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62 (Program of conferences only)

Resin Report 1979, K. di Cioccio, September, p. 19

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

The solids-draining-screw: a new twist for extrusion, I. Klein and R. Klein, October, p. 57

Cut injection molding costs through controlled starve feeding, D. B. Hunkar, November, p. 35

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

Current happenings along Additives Way, P. E. Staff, December, p. 39

27. Elastic Properties

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

28. End-Uses

ANTEC '79—SPE's 37th annual technical conference, March, p. 20, (Program of conference only)

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p.18

29. Energy Conservation

Reduce plant heating costs by recovering otherwise wasted energy, D. C. Williams, February, p. 35

ANTEC 79—the energy picture, July, p. 38, (Conference summaries only)

The Energy Picture—Boon or Bust? J. J. McKetta, July, p. 44 (Synopsis)

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

The solids-draining-screw: a new twist for extrusion, I. Klein and R. Klein, October, p. 57

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

Report from Dusseldorf, December, p. 40

30. Euretec

Polyolefins, recent improvements—applications and comparisons, First Euretec, April, p. 56, (Program of conference only)

31. Extenders

Current happenings along Additives Way, P. E. Staff, December, p. 39

32. Extruders

Short transitions can improve screw stability, W. Rahim, September, p. 51

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

33. Extrusion

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

The solids-draining-screw: a new twist for extrusion, I. Klein and R. Klein, October, p. 57

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

Report from Dusseldorf, December, p. 40

F

34. Fabrication

ANTEC '79—SPE's 37th annual technical conference, March, p. 20, (Program of conference only)

35. Fillers

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

36. Flame Retardants

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

37. Flammability

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

38. Flexural Properties

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

A new generation of corrosion-resistant polyesters based on TMPD glycol . . ., S. L. Hillman, M. Palmer, and J. H. Davis, June, p. 32

39. Flow

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. G. Johnson, August, p. 23

40. Foam

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

41. Foreign Countries

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

Report from Dusseldorf, December, p. 40

42. Formulations

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

43. Fuel Savings

Reduce plant heating costs by recovering otherwise wasted energy, D. C. Williams, February, p. 35

G

44. Glass Fibers

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

H

45. Heat Exchanger

Calculating heat-exchanger capacity for a heat-recovery system, R. F. Merrill, August, p. 30

46. Heat Resistance

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

I

47. Impact Modifiers

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

48. Impact Strength

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

49. Injection Molding

Injection-mold venting: the hidden processing parameter, P. E. Allen, January, p. 43

Tailoring molds to the high-speed production of thin-walled PP containers, S. D. J. Dagniaux, April, p. 25

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

Vary the volume, control the shrinkage, W. G. Halstead, J. R. Rinderle, and N. P. Suh, June, p. 41

Adding a new dimension to performance prediction—melt temperature, J. S. Norfleet, July, p. 32

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

Cut injection molding costs through controlled starve feeding, D. B. Hunkar, November, p. 35

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

Report from Dusseldorf, December, p. 40

L

50. Laminates

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

51. Lightfastness

Color it azo, J. Richter, April, p. 37

52. Lubricants

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

M

53. Machinery

Guidelines for the effective design of RIM molds, G. Misitano, February, p. 27

Thermoplastics stamping seeking stamp of approval, L. G. Ward, March, p. 47

Tailoring molds to the high-speed production of thin-walled PP containers, S. D. J. Dagniaux, April, p. 25

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Part design by the numbers, B. Buszkiewicz, June, p. 37

Processing and finishing of plastics in small business equipment and machine parts, Rochester Section, July, p. 59, (Program of conference only)

Obtaining the maximum from equipment, materials, and tooling, Injection Molding Division and Chicago Section, August, p. 64 (Program of conferences only)

NPE '79 Highlights, September, p. 27

Short transitions can improve screw stability, W. Rahim, September, p. 51

The solids-draining-screw; a new twist for extrusion, I. Klein and R. Klein, October, p. 57

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

54. Markets

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Are plasticizer markets softening? N. W. Touchette and J. W. Hirzy, April, p. 20

Plastics in the '80s will face new challenges, J. A. Rauch, May, p. 78

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p. 18

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

Heat stabilizers for PVC: something old, something new, W. J. Casey, August, p. 27

Additives sales in Europe climb—domestic markets also strong, P. E. Staff, October, p. 62

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

55. Materials

ANTEC '79—SPE's 37th annual technical conference, March, p. 20, (Program of conference only)

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62, (Program of conferences only)

Obtaining the maximum from equipment, materials, and tooling, Injection Molding Division and Chicago Section, August, p. 64, (Program of conferences only)

NPE '79 Highlights, September, p. 27

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

New strong silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

Report from Dusseldorf, December, p. 40

56. Mechanical Properties

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

57. Melt

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

58. Melt Channeling

The solids-draining-screw: a new twist for extrusion, I. Klein and R. Klein, October, p. 57

59. Melt Temperature

Adding a new dimension to performance prediction—melt temperature, J. S. Norfleet, July, p. 32

60. Microtoming

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

61. Mixing

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

New approach promises to revolutionize extrusion—Part II, Z. Tadmor, P. Hold, and L. Valsamis, December, p. 34

62. Mold Volume

Vary the volume, control the shrinkage, W. G. Halstead, J. R. Rinderle, and N. P. Suh, June, p. 41

63. Monomer Emission

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

64. Morphology

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

65. Motor Housings

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

N

66. National Plastics Exposition

NPE '79—Show Preview, May, p. 23 (Program of conference only)

NPE '79 Highlights, September, p. 27

67. National Technical Conference

NATEC '78—a dual conference on packaging and acrylonitrile, January, p. 20, (Program of conference only)

National Technical Conference on Automotive Plastics, October, p. 30 (Program of conference only)

68. Nylon

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

Designing for thin-section nylon, R. Sekhar, October, p. 53

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

O

69. Orientation

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

P

70. Packaging

NATEC '78—a dual conference on packaging and acrylonitrile, January, p. 20 (Program of conference only)

Advances in wire and cable/electronics packaging technology, Connecticut Section, August, p. 63 (Program of conferences only)

71. Pactec

Plastics technology advances: 1980 update, Western Sections, November, p. 59 (Program of conferences only)

72. Petrochemicals

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

73. Phenolics

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Adding a new dimension to performance prediction—melt temperature, J. S. Norfleet, July, p. 32

74. Photopolymers

Photopolymers: principles, processes, materials, Mid-Hudson Section, September, p. 76, (Program of conference only)

75. Physical Properties

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

Pultrusion: the other process, J. D. Martin, March, p. 53

A new generation of corrosion-resistant polyesters based on TMPD glycol . . ., S. L. Hillman, M. Palmer, and J. H. Davis, June, p. 32

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. G. Johnson, August, p. 23

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

Get the most for your money from your resin suppliers, P. E. Sample, December, p. 26

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

76. Pigments

Color it azo, J. Richter, April, p. 37

Optimizing pigment blending, C. P. Muller, June, p. 21

77. Plasticizers

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Are plasticizer markets softening? N. W. Touchette and J.W. Hirzy, April, p. 20

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

Current happenings along Additives Way, P. E. Staff, December, p. 39

78. Plastics

Plastics in the '80s will face new challenges, J. A. Rauch, May, p. 78

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p. 18

ANTEC 79—the energy picture, July, p. 38, (Conference summaries only)

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

Processing and finishing of plastics in small business equipment and machine parts, Rochester Section, July, p. 59, (Program of conference only)

Resin Report 1979, K. diCioccio, September, p. 19

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

Taiwan gets serious about plastics, R.B. Seymour, November, p. 26

Redesign of the vacuum reservoir: a case history in materials replacement, D. N. Tino, November, p. 37

Plastics technolgy advances: 1980 update, Western Sections, November, p. 59 (Program of conferences only)

79. Plastisols

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

80. Polyesters

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

A new generation of corrosion-resistant polyesters based on TMPD glycol . . ., S. L. Hillman, M. Palmer, and J. H. Davis, June, p. 32

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

Rotational molding: a process whose time has come, D. J. Ramazzotti, October, p. 47

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

81. Polyethylene

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. G. Johnson, August, p. 23

Resin Report 1979, K. diCioccio, September, p. 19

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

82. Polyolefins

Polyolefins, recent improvements—applications and comparisons, First Euretec, April, p. 56, (Program of conference only)

83. Polypropylene

Tailoring molds to the high-speed production of thin-walled PP containers, S. D. J. Dagniaux, April, p. 25

Optimizing pigment blending, C. P. Muller, June, p. 21

Resin Report 1979, K. diCioccio, September, p. 19

Short transitions can improve screw stability, W. Rahim, September, p. 51

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

84. Polystyrene

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Resin Report 1979, K. diCioccio, September, p. 19

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

85. Polyurethane

Resin Report 1979, K. diCioccio, September, p. 19

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

86. Polyvinyl Chloride

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

Heat stabilizers for PVC: something old, something new, W. J. Casey, August, p. 27

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62 (Program of conferences only)

Resin Report 1979, K. diCioccio, September, p. 19

Replacing DOP as a plasticizer for polyvinyl chloride, W. D. Arendt, September, p. 46

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

87. Postforming

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

88. Pressure Dependence

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Short transitions can improve screw stability, W. Rahim, September, p. 51

89. Processing

Injection-mold venting: the hidden processing parameter, P. E. Allen, January, p. 43

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Thermoplastics stamping seeking stamp of approval, L. G. Ward, March, p. 47

Pultrusion: the other process, J. D. Martin, March, p. 53

Are plasticizer markets softening? N. W. Touchette and J. W. Hirzy, April p. 20

New concepts spur development of ultra-high speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

Injection-molding ABS? Mold in quality with the machine, L. Fritch, May, p. 68

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Plastics in the '80s will face new challenges, J. A. Rauch, May, p. 78

A new generation of corrosion-resistant polyesters based on TMPD glycol . . ., S. L. Hillman, M. Palmer, and J. H. Davis, June, p. 32

Vary the volume, control the shrinkage, W. G. Halstead, J. R. Rinderle, and N. P. Suh, June, p. 41

Designing with plastics: an embarrassment of riches, H. McQuiston, July, p. 18

Adding a new dimension to performance prediction—melt temperature, J. S. Norfleet, July, p. 32

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

Processing and finishing of plastics in small business equipment and machine parts, Rochester Section, July, p. 59, (Program of conference only)

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62, (Program of conferences only)

Short transitions can improve screw stability, W. Rahim, September, p. 51

Rotational molding: a process whose time has come, D. J. Ramazzotti, October, p. 47

A radical design that promises an extruder revolution—Part I, Z. Tadmor, P. Hold, and L. Valsamis, November, p. 20

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

Report from Dusseldorf, December, p. 40

90. Production

Are plasticizer markets softening? N. W. Touchette and J. W. Hirzy, April, p. 20

Short transitions can improve screw stability, W. Rahim, September, p. 51

Taiwan gets serious about plastics, R. B. Seymour, November, p. 26

91. Pultrusion

Pultrusion: the other process, J. D. Martin, March, p. 53

R

92. Reaction Injection Molding

Guidelines for the effective design of RIM molds, G. Misitano, February, p. 27

93. Refrigerators

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

94. Regional Technical Conference

Processing and finishing of plastics in small business equipment and machine parts, Rochester Section, July, p. 59, (Program of conference only)

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62, (Program of conference only)

Advances in wire and cable/electronics packaging technology, Connecticut Section, August, p. 63 (Program of conference only)

3rd Annual Regional Technical Conference, Decorating Division and Southern Section, August, p. 65 (Program of conference only)

Photopolymers: principles, processes, materials, Mid-Hudson Section, September, p. 76, (Program of conference only)

Color and appearance control, Philadelphia Section, September, p. 77, (Program of conference only)

Growing with thermosets, Chicago Section and Thermoset Division, December, p. 57 (Program of conference only)

95. Reinforced Plastics

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Plastics and the mid-eighties automobile, H. McQuiston, October, p. 22

New strong, silent-type plastic mop wringer puts the squeeze on metal, G. Terek, December, p. 29

96. Reinforcements

Additives, fillers, and reinforcements for 1979, P. E. Staff, January, p. 25

Pultrusion: the other process, J. D. Martin, March, p. 53

97. Resins

Resin Report 1979, K. diCioccio, September, p. 19

98. Rheology

Color it azo, J. Richter, April, p. 37

99. Rotational Molding

Calculating heat-exchanger capacity for a heat-recovery system, R. F. Merrill, August, p. 30

Rotational molding: a process whose time has come, D. J. Ramazzotti, October, p. 47

S

100. Sales

Resin Report 1979, K. diCioccio, September, p. 19

101. Screw Speed

New concepts spur development of ultra-high-speed extrusion, G. A. Kruder and R. E. Ridenour, April, p. 29

The solids-draining-screw: a new twist for extrusion, I. Klein and R. Klein, October, p. 57

102. Screw Stability

Short transitions can improve screw stability, W. Rahim, September, p. 51

103. Shear

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

104. Sheet

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

105. Shrinkage

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Vary the volume, control the shrinkage, W. G. Halstead, J. R. Rinderle, and N. P. Suh, June, p. 41

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. C. Johnson, August, p. 23

106. Siding

Predicting surface distortion in vinyl siding—and avoiding it, J. W. Summers and R. J. Brown, April, p. 34

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

107. Smoke

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

108. Society

NATEC'78—a dual conference on packaging and acylonitrile, January, p. 20, (Program of conference only)

ANTEC'79—SPE's 37th annual technical conference, March, p. 20, (Program of conference only)

1979-1980 International Officers for SPE, April, p. 18

Polyolefins, recent improvements—applications and comparisons, First Euretec, April, p. 56, (Program of conference only)

NPE'79—Show Preview, May, p. 23 (Program of conference only)

ANTEC 79—the energy picture, July, p. 38, (Conference summaries only)

The Energy Picture—Boon or Bust? J. J. McKetta, July, p. 44, (Synopsis)

"Plastics and energy—conserver or consumer?" A. Morton, July, p. 47

Processing and finishing of plastics in small business equipment and machine parts, Rochester Section, July, p. 59, (Program of conference only)

1979 SPE Directory, August, p. 37

The PVC industry: economics, materials, processing an open forum panel series, Vinyl Division and Palisades Section, August, p. 62, (Program of conference only)

Advances in wire and cable/electronics packaging technology, Connecticut Section, August, p. 63 (Program of conference only)

Obtaining the maximum from equipment, materials, and tooling, Injection Molding Division and Chicago Section, August, p. 64 (Program of conference only)

3rd Annual Regional Technical Conference, Decorating Division and Southern Section, August, p. 65 (Program of conference only)

NPE '79 Highlights, September, p. 27

Photopolymers:principles, processes, materials, Mid-Hudson Section, September, p. 76, (Program of conference only)

Color and appearance control, Philadelphia Section, September, p. 77, (Program of conference only)

National Technical Conference on Automotive Plastics, October, p. 30, (Program of conference only)

Plastics technology advances: 1980 update, Western Sections, November, p. 59 (Program of conferences only)

Growing with thermosets, Chicago Section and Thermoset Division, December, p. 57 (Program of conferences only)

109. Stability

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

110. Stabilizers

Additives, fillers, and reinforcements for 1979, PE Staff, January, p. 25

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

Heat stabilizers for PVC: something old, something new, W. J. Casey, August, p. 27

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

111. Stamping

Thermoplastics stamping seeking stamp of approval, L. G. Ward, March, p. 47

112. Standards

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

113. Strength

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

114. Stress-Strain

Part design by the numbers, B. Buszkiewicz, June, p. 37

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

Designing for thin-section nylon, R. Sekhar, October, p. 53

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

115. Structure

Microtoming: an emerging tool for analyzing polymer structures, G. R. Bell and D. C. Cook, August, p. 18

116. Suppliers

Get the most for your money from your resin supplier, P. E. Sample, December, p. 26

Current happenings along Additives Way, PE Staff, December, p. 39

117. Surface Distortion

Predicting surface distortion in vinyl siding—and avoiding it, J. W. Summers and R. J. Brown, April, p. 34

118. Synthesis

A new generation of corrosion-resistant polyesters based on TMPD glycol . . ., S. L. Hillman, M. Palmer, and J. H. Davis, June, p. 32

T

119. Technology

Heat stabilizers for PVC: something old, something new, W. J. Casey, August, p. 27

Advances in wire and cable/electronics packaging technology, Connecticut Section, August, p. 63 (Program of conferences only)

Update on UV stabilizers and antioxidants, E. W. Lovely and J. D. Hargis, November, p. 32

Plastics technology advances: 1980 update, Western Sections, November, p. 59 (Program of conferences only)

120. Temperature Dependence

Design criteria for reinforced-plastics parts of processing equipment, L. S. Norwood and A. F. Millman, May, p. 73

Predicting surface distortion in vinyl siding—and avoiding it, J. W. Summers and R. J. Brown, April, p. 34

Adding a new dimension to performance prediction—melt temperature, J. S. Norfleet, July, p. 32

Calculating heat-exchanger capacity for a heat-recovery system, R. F. Merrill, August, p. 30

121. Testing

Look to mold pressure to control heat resistance and shrinkage of parts, S. E. Meacham, February, p. 33

Controlling flammability and smoke emissions in reinforced polyesters, J. E. Selley and P. W. Vaccarella, February, p. 43

122. Thermal Properties

Anatomy of a glass-reinforced-polyester motor housing, S. M. Crites and L. Ozbun, January, p. 39

123. Thermoforming

Trends in processing machinery for the 80s, H. McQuiston, December, p. 17

124. Thermoplastics

ATH may be moving in as a flame-retardant filler for thermoplastics, S. Salman and D. Klempner, February, p. 39

Thermoplastics stamping seeking stamp of approval, L. G. Ward, March, p. 47

Resin Report 1979, K. diCioccio, September, p. 19

Cut injection molding costs through controlled starve feeding, D. B. Hunkar, November, p. 35

125. Thermosets

Resin Report 1979, K. diCioccio, September, p. 19

Cut injection molding costs through controlled starve feeding, D. B. Hunkar, November, p. 35

Growing with thermosets, Chicago Section and Thermoset Division, December, p. 57 (Program of conference only)

126. Thickness

Shrinkage compensation by design: the key to parts uniformity, R. G. Egbers and K. G. Johnson, August, p. 23

127. Time Dependence

Reducing styrene emission from unsaturated polyester, M. J. Duffy, August, p. 33

How to shorten stress test time for vacuum-formed ABS, G. W. Brewer, November, p. 28

128. Tooling

Obtaining the maximum from equipment, materials, and tooling, Injection Molding Division and Chicago Section, August, p. 64 (Program of conference only)

V

129. Venting

Injection-mold venting: the hidden processing parameter, P. E. Allen, January, p. 43

130. Vinyls

Predicting surface distortion in vinyl siding—and avoiding it, J. W. Summers and R. J. Brown, April, p. 34

Optimizing pigment blending, C. P. Muller, June, p. 21

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29

131. Viscosity

Injection molding TMC for class A surfaces, A. Mekjian, September, p. 56

W

132. Weathering

Color it azo, J. Richter, April, p. 37

Modified-acrylic impact modifier for superior vinyl siding, A. Stoloff, July, p. 29
